

# How Amnet efficiently handles full-service project management for an online training guidebook

## Background

---

The client is a global organization focused on achieving sustainable growth and prosperity for its 180+ member countries. The online course for which Amnet has been contracted to provide full-service project management aims to enhance knowledge and understanding of key features in the organizational design of tax administrations.

## Client Requirements

---

The client provided an online training guidebook and required Amnet's expertise in editorial and production services that included copyediting, proofreading, project management, typesetting, barcode generation, and web PDF. The client-supplied content included varied elements such as the outline of the purpose, course content, learning aids (infographics, diagrams, tables), summary, and an appendix with relevant examples and case studies.

## Amnet's Approach

---

Keeping in view the nature of course material and to ensure the highest-quality services for the client, Amnet deployed a dedicated project manager and a team of experienced content editors with expertise in the pedagogical aspects of developing educational content. The project manager, as the single point of contact for the client, efficiently collaborates with stakeholders from Amnet and the

client. Amnet efficiently managed both the editorial and production processes for the modules of the guidebook completed so far and continues to take care of subsequent modules for the client.

## Current Engagement

---

As part of ongoing collaboration, Amnet delivers comprehensive end-to-end project management and tailored services (e.g., editorial-only or typesetting-only) for several other publications produced by the client. This development is testament to the client's trust in Amnet's expertise and quality.

## About Amnet

---

With 25 years of experience, Amnet offers end-to-end traditional and digital publishing solutions including peer-review management, editorial, project management, production, accessibility, and technology for university presses and other publishers in all sectors and around the globe.
